

## CLAIMS

### *What is claimed is:*

- 1 1. A method for allowing a user to login from anywhere in the world utilizing a  
2 network, comprising the steps of:
  - 3 (a) receiving a request to login from a user;
  - 4 (b) allowing the selection of a language to be used during the login, in response  
5 to the request; and
  - 6 (c) displaying a virtual input device on a display for allowing the user to login  
7 utilizing the selected language.
- 1 2. The method as recited in claim 1, wherein the virtual input device includes a  
2 virtual keyboard.
- 1 3. The method as recited in claim 2, wherein the virtual keyboard includes  
2 alphanumeric characters in the selected language.
- 1 4. The method as recited in claim 1, wherein the request to login is received  
2 from the user utilizing a network, and the virtual input device is transmitted  
3 utilizing the network.
- 1 5. The method as recited in claim 1, wherein the login includes entering a user  
2 name and a password.
- 1 6. The method as recited in claim 1, wherein the login is conducted for the  
2 purpose of accessing a system associated with an apparel industry.
- 1 7. A computer program product for allowing a user to login from anywhere in  
2 the world utilizing a network, comprising:
  - 3 (a) computer code for receiving a request to login from a user;

- 4 (b) computer code for allowing the selection of a language to be used during the  
5 login, in response to the request; and  
6 (c) computer code for displaying a virtual input device on a display for allowing  
7 the user to login utilizing the selected language.

1 8. The computer program product as recited in claim 7, wherein the virtual  
2 input device includes a virtual keyboard.

1 9. The computer program product as recited in claim 8, wherein the virtual  
2 keyboard includes alphanumeric characters in the selected language.

1 10. The computer program product as recited in claim 7, wherein the request to  
2 login is received from the user utilizing a network, and the virtual input  
3 device is transmitted utilizing the network.

1 11. The computer program product as recited in claim 7, wherein the login  
2 includes entering a user name and a password.

1 12. The computer program product as recited in claim 7, wherein the login is  
2 conducted for the purpose of accessing a system associated with an apparel  
3 industry.

1 13. A system for allowing a user to login from anywhere in the world utilizing a  
2 network, comprising:

- 3 (a) logic for receiving a request to login from a user;  
4 (b) logic for allowing the selection of a language to be used during the login, in  
5 response to the request; and  
6 (c) logic for displaying a virtual input device on a display for allowing the user  
7 to login utilizing the selected language.

1 14. The system as recited in claim 13, wherein the virtual input device includes a  
2 virtual keyboard.

- 1 15. The system as recited in claim 14, wherein the virtual keyboard includes  
2 alphanumeric characters in the selected language.
- 1 16. The system as recited in claim 13, wherein the request to login is received  
2 from the user utilizing a network, and the virtual input device is transmitted  
3 utilizing the network.
- 1 17. The system as recited in claim 13, wherein the login includes entering a user  
2 name and a password.
- 1 18. The system as recited in claim 13, wherein the login is conducted for the  
2 purpose of accessing a system associated with an apparel industry.
